SUMMARY

Staff engineer, 12 years, platform and infrastructure. Led the migration of a payments platform to Kubernetes across four teams, and cut cloud spend by 38 percent without a reliability regression. Looking for a platform role with ownership of reliability and cost.

EXPERIENCE

Northwind Payments Berlin, Germany
Staff Engineer, Platform *Mar 2021 – Present*

- Own reliability for a payments platform serving 4 million transactions a day across four teams and 30 engineers. Cut p99 checkout latency from 900ms to 210ms by replacing an N+1 query path and adding a read replica.
- Led the migration of 42 services from VMs to Kubernetes over nine months with no customer visible downtime. Wrote the migration playbook 12 teams now use.
- Cut cloud spend 38 percent, about EUR 2.1 million a year, by moving batch workloads to spot instances and deleting three redundant data pipelines.
- Introduced error budgets and a weekly reliability review. Sev-1 incidents fell from 11 per quarter to 3, and mean time to recovery from 74 minutes to 22.

Eastgate Logistics Amsterdam, Netherlands
Senior Software Engineer *Jun 2017 – Feb 2021*

- Built the routing service that plans 60,000 deliveries a day, replacing a licensed product and saving EUR 400,000 a year in licence fees.
- Rewrote the dispatch API from a monolith into four services, taking deploy frequency from weekly to daily and cutting rollback rate from 18 percent to 4 percent.
- Mentored six engineers, three of whom reached senior within two years.

Arcadia Systems Bengaluru, India
Software Engineer *Jul 2013 – May 2017*

- Built the billing engine for a SaaS product with 8,000 business customers, handling invoices in 14 currencies.
- Cut month-end billing runtime from 6 hours to 40 minutes by batching database writes.

PROJECTS

OpenTelemetry collector contribution upstream
Added a batching processor option adopted in v0.88 *2024*

- Wrote the processor, benchmarks and documentation. Two public Helm charts use the option.

SKILLS

Platform: Kubernetes, Terraform, AWS, Linux, Prometheus, OpenTelemetry
Languages: Go, Python, SQL, a working amount of Rust
Practice: incident response, capacity planning, cost engineering

EDUCATION

National Institute of Technology, Trichy Tiruchirappalli, India
B.Tech in Computer Science and Engineering *2009 – 2013*
First class with distinction. Awarded institute merit scholarship for two years.
